ENTERPRISE MAINTENANCE

- Standard Operating Procedure (SOP) allows Granite to draft a comprehensive strategy adhering to our client's standards.
- Our experienced staff and field technicians will work directly with local and corporate teams to resolve issues nationwide.
- Granite provides real-time visibility on the status of your work orders using an online portal.
- Ability to manage client IT/Telephony hardware and provide restoration services to extend the product lifecycle. We populate the device back into your inventory for easy management.

PROJECT MANAGEMENT

Granite's project management team can develop a diverse solution involving the integration of new functionality into your current technology environment through installing a completely new communications strategy.

Granite Project Managers are directly responsible for learning each client's specifications, standards and methodologies. Combined with our industry knowledge, Granite can customize an integrated program throughout the life of the partnership.
