

One Consolidated Solution. **One Clear Choice.**

## Broadband

With Granite Telecommunications' broadband service your business will have all of the speed, functionality and reliability it needs. If your area has been wired for broadband Granite can support your business. We are committed to offering our customers the most advanced service in DSL, cable and wireless solutions.

### **National coverage for multi-locations**

Our prequalification tools will evaluate any location in the continental United States for broadband service. If the service is available in your area, Granite will manage the entire ordering and tracking of the service installation process as well as scheduling any needed professional installation and inside wiring for all of your locations.

### **Scalable solutions**

Granite's array of providers allows us to deliver a variety of broadband solutions including DSL, cable based and wireless broadband. Using these technologies Granite Telecommunications can provide a variety of transmission speeds. No other single provider can deliver multiple solutions nationwide.

When you choose to use Granite Telecommunications wireless service or take advantage of our entire suite of offering – **POTS** (Plain Old Telephone Service), **Wireless**, and **Infrastructure Solutions** you will see dramatic cost savings and a decrease in administrative burdens with;

- > One point of contact, available 24/7/365
- > One bill, customized to fit your needs
- > One company, offering nationwide service, coast to coast and border to border
