EXPLANATION OF SYMBOLS

- (I) To signify an **increase** in rates.
- (D) To signify a **decrease** in rates.
- (C) To signify any other changes.

TARIFF FORMAT

- A. **Page Numbering** - Page numbers appear in the upper right corner of the Page. Pages are numbered sequentially. However, occasionally, when a new Page is added between Pages already in effect, a decimal is added. For example, a new Page added between Pages 14 and 15 would be 14.1.
- B. **Page Revision Numbers** - Revision numbers also appear in the upper right corner of each Page. These numbers are used to determine the most current Page version on file with the Commission. For example, the 4th revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc. the Commission follows in its tariff approval process, the most current Page number on file with the Commission is not always the Page in effect. Consult the Check Sheet for the Page currently in effect.
- C. **Paragraph Numbering Sequence** – There are nine levels of paragraph coding. Each level of code is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. **Check Sheet** - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the Pages contained in the tariff with a cross-reference to the current revision number. When new Pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this Page if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some Pages). The tariff user should refer to the latest Check Sheet to find if a particular Page is the most current on file with the Commission.

SECTION 2 - RULES AND REGULATIONS, Continued**2.19. INTRALATA PRESUBSCRIPTION PLAN**

2.19.1. Introduction

Toll Presubscription is a procedure whereby the Customer designates to the Company the IntraLATA and InterLATA Toll Providers, i.e., Interexchange Carriers (IXCs) that the Customer wishes to be its carrier(s) of choice for toll calls. Such calls are automatically directed to the designated carrier(s) without the need to use special access codes or additional dialing to direct the calls to the designated carrier. Toll Presubscription does not prevent a Customer who has presubscribed to a toll carrier from using carrier access codes or additional dialing to direct calls to an alternative toll carrier on a per call basis.

Each carrier will have one or more access codes assigned to it for various types of service. When the Customer selects a carrier as its preferred IXC, only one access code of that carrier may be incorporated into the switching system of the Company permitting access to that carrier by the Customer without dialing a access code. Should the Customer wish to use other services of the same carrier, it will be necessary for the Customer to dial the necessary access code(s) to reach that carrier's other service(s).

An IXC must use Feature Group D (FGD) Switched Access Service to qualify as a presubscription toll provider unless prior arrangements have been made with or by the Company. IXCs must submit an Access Service Request (ASR) to the Company.

Selection of toll Presubscription providers by an end user is subject to the terms and conditions following.

- 2.19.2. At the option of the IXCs, the nonrecurring charges for a change in toll Presubscription, as provided herein, may be billed to the IXCs, instead of the Customer. This may involve charges resulting from Customer initial free choice Preferred Interexchange Carrier (PIC), as specified in 2.19.3. A. following:

SECTION 2 – RULES AND REGULATIONS, Continued**2.19. INTRALATA PRESUBSCRIPTION PLAN, Continued**

2.19.3. Presubscription Charge Application

A. Customer choices for toll presubscription:

1. Designating an intraLATA and interLATA IXC(s) as primary carrier(s) thereby requiring no access code to access those IXCs' service. A Customer is not required to choose the same IXC for intraLATA and interLATA toll Presubscription. Other nonpresubscribed IXCs are accessed by 10XXX, 101XXXX, or other required codes.
2. Choosing no carrier as a primary carrier thus requiring 10XXX or 101XXXX code dialing to access all IXCs.

B. If a new Customer cannot decide upon presubscription IXCs, the Company may extend a 30-day period following completion of the initial service request to make a choice without charge. In the interim, the Customer will be assigned as a "No-PIC" and must dial an access code to make toll calls.

C. If an IXC elects to discontinue Feature Group , the IXC is obligated to contact, in writing, all Customers who have selected the canceling IXC as their preferred toll provider. The IXC must inform the Customers that it is canceling its Feature Group D Service, request that the end user select a new IXC, and state that the canceling IXC will pay the PIC change charge as provided herein. The IXC must provide written notification to the Company that this activity has taken place.

Following the IXC's discontinuance of service, the Company will bill the canceling IXC the change charge for each end user that is currently designated to the IXC at the time of discontinuance.

SECTION 2 – RULES AND REGULATIONS, Continued**2.19. INTRALATA PRESUBSCRIPTION PLAN, Continued**

2.19.3. Carrier Information, Continued

- D. An unauthorized PIC change is a change in the presubscribed IXC that the Customer denies authorizing. PIC disputes for Customers are resolved through an investigative process.

If an unauthorized change in toll presubscription occurs, the IXC making the unauthorized change will be assessed a charge for unauthorized change in the presubscription as provided in 12.19.6 following. In addition, the IXC will be assessed the applicable charge for returning the Customer to the preferred IXC.

If an unauthorized change in intraLATA and interLATA presubscription occurs at the same time, on the same Business/Residence line, and the presubscribed IXC is the same carrier for intraLATA and interLATA, presubscription change charges as provide herein and in the Company's corresponding F.C.C. Access Tariff apply. In addition, the IXC will be assessed the applicable charges for returning the end user to the preferred IXC as provided herein and in the Company's corresponding F.C.C. tariff.

2.19.4. Customer Charge Discrepancy

- A. When a discrepancy is determined regarding a Customer's designation of a presubscription IXC, the following applies depending upon the situation described:
1. A signed letter of authorization take precedence over any order other than subsequent, direct customer contact with the Company.
 2. When two or more orders are received for a Customer line generated by telemarketing, the date field on the mechanized record used to transmit PIC change information will be used as the PIC authorization date. The order with the latest application date/time determines the Customer's choice.

SECTION 2 – RULES AND REGULATIONS, Continued**2.19. INTRALATA PRESUBSCRIPTION PLAN, Continued**

2.19.4 Customer Charge Discrepancy, Continued

3. If a Customer denies requesting a change in toll presubscription as submitted by an IXC, and the IXC is unable to produce a letter of authorization, signed by the end user, the IXC will be assessed all applicable change charges. The nonrecurring change charges are provided herein. The IXC will also be assessed the presubscription change charge as specified herein, which was previously billed to the end user.

B. Verification of Orders for Telemarketing.

Neither the IXC or the Company shall submit a PIC change order generated by outbound telemarketing unless and until the order has been confirmed in accordance with the F.C.C.'s current anti-slamming practices and procedures.

2.19.5 PIC Switchback Option-Business.

PIC Switchback is an option under which no investigation activities are performed by the Company when a Customer denies requesting a change in primary toll carrier submitted by the IXCs. The IXC participating in PIC Switchback will be billed the PIC Switchback Charge, and the presubscription change charge, as specified herein, to switch the Customer to the Customer's previous carrier.

When the Company is contacted by a Customer who denies requesting a change in primary toll carrier, the Customer will be credited the charge assessed for the disputed change in carrier and will be switched back to the previous IXC at no charge. If this service is made available by the Company, the IXCs may subscribe or cancel PIC Switchback Service on 30 days notice to the Company by submitting a written request. A letter of authorization from the IXC will not be requested or accepted at a later date in the event of dispute of the charges assessed under the PIC Switchback option.

SECTION 2 – RULES AND REGULATIONS, Continued**2.19. INTRALATA PRESUBSCRIPTION PLAN, Continued**

2.19.5 PIC Switchback Option-Business/Residence, Continued

This option in no way relieves an IXC of the F.C.C. requirements for verifying all PIC orders obtained by outbound telemarketing prior to submitting those orders, or instituting steps to obtain verification of orders submitted to the Company.

In addition, the Customer has the option of initiating a complaint to the F.C.C. or the Pennsylvania Public Utility Commission's Bureau of Consumer Services concerning unauthorized changes in toll presubscription.

2.19.6 Rates and Charges

	<u>Per Line Nonrecurring Charge</u>

- C. If a Company Customer denies requesting a change in intraLATA toll providers as submitted by an intraLATA Carrier, and the intraLATA carrier is unable to produce evidence that the PIC change was properly executed pursuant to Commission and FCC PIC change rules, the intraLATA carrier will be assessed a \$75.00 charge for the unauthorized PIC change and the PIC will be changed as per the Customer's request, in addition to any charges assessed by Company or the underlying Carrier or other penalties authorized by law.

In addition to any state and local taxes that might apply to the listed rates, the following taxes and surcharges will be imposed.

4.5.1. Telecommunications Relay Service Surcharge

The Pennsylvania Telecommunications Relay Service (“TRS”) is a relay telecommunications service for the deaf, hearing and/or speech disabled population of the Commonwealth. The service permits telephone communications between individuals with hearing and/or speech disabilities who must use a Text Telephone and individuals with normal hearing and speech.

A. Surcharge

In addition to the charges provided in this Tariff and the Company’s other intrastate tariffs, a surcharge will apply to all business access lines served by Company. This surcharge applies regardless of whether or not the access line uses the Pennsylvania Telecommunications Relay Service.

This surcharge serves as the funding vehicle for the operation of the Pennsylvania Telecommunications Relay Service, and shall be calculated by the Commission. The Commission shall compute the Pennsylvania Relay Service Surcharge each year and notify local exchange carriers of the surcharge amount to be applied for the twelve-month period commencing with July 1, of each year.

The Commission may revise the surcharge more frequently than annually at its discretion. Tariff revisions will be filed whenever the Commission calculates a new surcharge amount and notifies the Company.

The following surcharge applies to all bills issued on or after July 1, 2008.

4.5.2. Telecommunications Relay Service Surcharge, Continued

Local calls will be charged at the applicable local flat rate or local measured service rate, except for calls originating from Pay Telephones, which shall be completed free of charge. All IntraLATA toll calls placed through the Pennsylvania Telecommunications Relay Service will be rated according to the Rates Applicable on Messages Placed by Certified Speech and/or Hearing Disabled rates in the Pennsylvania Telephone Association Toll Tariff PA P.U.C. No. 10. This Company concurs with this Tariff.

The Company will make available to the Telecommunications Relay Service (TRS) user either a calling card or a prepaid debit card. The rates for either option will not exceed those that would apply to identical calls for non-TRS users of coin-sent-paid service.

**SECTION 7 - EMERGENCY/CRISIS/DISASTER/RESTORATION AND PROVISIONING –
TELECOMMUNICATIONS SERVICE PRIORITY****7.1. GENERAL**

The Telecommunications Service Priority (TSP) Program is a federal program used to identify and prioritize telecommunications services that support national security or emergency preparedness (NS/EP) missions.

NS/EP services are defined as those telecommunications services which are used to maintain a Commonwealth of readiness or respond to and manage any event or crisis which causes or could cause injury or harm to the population, damage or loss to property, or degrades or threatens the NS/EP posture of the United States.

TSP restoration and/or provisioning shall be provided in accordance with Part 64, Appendix A of the Federal Communications Commission's Rules and Regulations (47 C.F.R.), and the "Service Vendor Handbook For The Telecommunications Service Priority (TSP) Program" and the "Service User Manual for the Telecommunications Service Priority (TSP) System" (NCS Manual 3-1-1) (Service User Manual) issued and updated as necessary by the Office of Priority Telecommunications (OPT) of the National Communications System. Any changes to or reissuance of these regulations or manuals supersede Service Guide language contained herein.

7.2. TSP PROGRAM COMPONENTS

The TSP program has two components, restoration and provisioning.

1. A restoration priority is applied to new or existing telecommunications services to ensure restoration before any other services during a service outage. TSP restoration priorities must be requested and assigned before a service outage occurs.
2. A provisioning priority is obtained to facilitate priority installation of new telecommunications services during a service outage. Provisioning on a priority basis becomes necessary when an end-user has an urgent requirement for a new NS/EP service that must be installed immediately or by a specific due date that can be met only by a shorter than standard or expedited Company provisioning time frame. As a matter of general practice, existing TSP services will be restored before provisioning new TSP services.

**SECTION 7 - EMERGENCY/CRISIS/DISASTER/RESTORATION AND PROVISIONING –
TELECOMMUNICATIONS SERVICE PRIORITY, Continued****7.3. TSP REQUEST PROCESS – RESTORATION**

To request a TSP restoration priority assignment, a prospective TSP user must:

1. determine that the user's telecommunications service supports an NS/EP function under one of the following TSP categories.
 - a. National Security Leadership
 1. National Security Posture and U.S. Population Attack Warning
 2. Public Health, Safety, and Maintenance of Law and Order
 3. Public Welfare and Maintenance of National Economic Posture.
2. identify the priority level to be requested for the telecommunications service. The priority level is determined by the end-user's TSP category and service profile. The service profile defines the user's level of support to the portion of the telecommunications service that the user owns and operates, such as Customer Premises Equipment or wiring. The five levels of priority and seven element groups that define the service profile are contained in the Service User Manual.
3. Complete the TSP Request for Service Users form (SF 315) available on the National Communications System (NCS) website (<http://tsp.ncs.gov/>).
4. For non-federal users, have their TSP requests approved by a federal agency sponsor. Non-federal users should contact the OPT, at the NCS website (<http://tsp.ncs.gov/>), for information on identifying a sponsor for TSP requests.
5. Submit the SF 315 to the OPT.
6. Upon receipt of the TSP Authorization Code from the OPT, notify the Company, and include the TSP Authorization Code in any service order to the Company requesting restoration of NS/EP services.

**SECTION 7 - EMERGENCY/CRISIS/DISASTER/RESTORATION AND PROVISIONING –
TELECOMMUNICATIONS SERVICE PRIORITY, Continued****7.4. TSP REQUEST PROCESS – PROVISIONING**

To request a TSP provisioning priority assignment, a prospective TSP user must follow the same steps listed above for restoration priority assignment except for the following differences. The user should:

1. certify that its telecommunications service is an Emergency service. Emergency services are those that support one of the NS/EP functions listed above and are so critical that they must be provisioned at the earliest possible time, without regard to cost to the user.
2. verify that the Company cannot meet the service due date without a TSP assignment.
3. obtain approval from the end-user's invocation official to request a provisioning priority. Invocation officials are designated individuals with the authority to request TSP provisioning for a telecommunications service, and include the head or director of a federal agency, commander of a unified/specified military command, chief of a military service, commander of a major military command, or state governor.

**SECTION 7 - EMERGENCY/CRISIS/DISASTER/RESTORATION AND PROVISIONING –
TELECOMMUNICATIONS SERVICE PRIORITY, Continued**

7.5. RESPONSIBILITIES OF THE END USER

End-users or entities acting on their behalf must perform the following:

1. Identify telecommunications services requiring priority.
2. Request, justify, and revalidate all priority level assignments. Revalidation must be completed every 2 years, and must be done before expiration of the end-user's TSP Authorization Code(s).
3. Accept TSP services by the service due dates.
4. Have Customer Premises Equipment (CPE) and Customer Premises Wiring (CPW) available by the requested service due date and ensure (through contractual means or otherwise) priority treatment for CPE and CPW necessary for end-to-end service continuity.
5. Pay the Company any authorized costs associated with priority services.
6. Report to the Company any failed or unusable services with priority levels.
7. Designate a 24-hour point of contact for each TSP request and apprise the OPT.
8. Cooperate with the OPT during reconciliation (comparison of NS/EP service information and resolution of any identified discrepancies) and revalidation.

**SECTION 7 - EMERGENCY/CRISIS/DISASTER/RESTORATION AND PROVISIONING –
TELECOMMUNICATIONS SERVICE PRIORITY, Continued****7.6. RESPONSIBILITIES OF THE COMPANY**

The Company will perform the following:

1. Provide TSP service only after receipt of a TSP authorization code.
2. Revoke TSP services at the direction of the end-user or OPT.
3. Ensure that TSP Program priorities supersede any other telecommunications priority that may be provided (other than control services and order wires).
4. Designate a 24-hour point of contact to receive reports of TSP service outages from TSP service users.
5. Designate a 24-hour point of contact to coordinate TSP processes with the OPT.
6. Confirm completion of TSP service order activity to the OPT.
7. Participate in reconciliation of TSP information at the request of the OPT.
8. Ensure that all subcontractors complete reconciliation of TSP information with the service vendor.
9. Ensure that other carriers supplying underlying facilities are provided information necessary to implement priority treatment of facilities that support NS/EP services.
10. Assist in ensuring that priority level assignments of NS/EP services are accurately identified "end-to-end" by providing to subcontractors and interconnecting carriers the restoration priority level assigned to a service.
11. Disclose content of the NS/EP TSP database only as may be required by law.
12. Comply with regulations and procedures supplemental to and consistent with guidelines issued by the OPT.

7.7. PREEMPTION

When spare facilities are not available, it may be necessary for the Company to preempt the facilities required to provision or restore a TSP service. When preemption is necessary, non-TSP services may be preempted based on the Company's best judgment. If no suitable spare or non-TSP services are available, the Company may preempt an existing TSP service to restore a TSP service with a higher restoration priority assignment. When preemption is necessary, prior consent of the service user whose service will be preempted is not required; however, the Company will make every reasonable effort to notify the preempted Customer of the action to be taken.

SECTION 8 – CRITICAL FACILITIES ADMINISTRATION SERVICE**8.1. PROGRAM OVERVIEW**

Facilities-based carriers are responsible to provide data on the physical path of qualified circuits to customers who request such information. Such carriers are required to maintain facilities associated with qualified circuits in such a manner as to ensure that notification of a change in the physical routing of a qualifying circuit is communicated quickly to the affected customer, and the physical path data promptly updated. Such carriers will maintain the data and establish appropriate methods of identification and authentication to secure the data and restrict access by each customer to information relative to that customer's qualifying circuits.

Customers are required to demonstrate for each qualifying circuit that the circuit has been registered under the federal Telecommunications Service Priority program in order to participate.

8.2. CUSTOMER RESPONSIBILITIES

Customers participating under the Critical Facilities Administration program will be required to:

- 8.2.1. Identify critical facilities by enrolling circuits in the federal Telecommunications Service Priority program and demonstrating the sponsorship of a federal agency supporting the designation of those circuits as qualifying under the federal Telecommunications Service Priority program. Such circuits will be referred to as "qualifying circuits."
- 8.2.2. Subscribe to the Critical Facilities Administration service offered by their carrier, and identify which qualifying circuits it wishes to enroll in the service. Such circuits will be referred to as "subscribed circuits."

SECTION 8 – CRITICAL FACILITIES ADMINISTRATION SERVICE, Continued**8.3. CARRIER OBLIGATIONS**

Facilities-based carriers will be obligated to identify the physical path of each subscribed circuit as follows:

- 8.3.1. Physical path information will be provided by reference to the latitude and longitude coordinates of suitable points along the circuit's path (e.g., cable entrances to buildings, manholes, riser poles, cross boxes, carrier equipment cabinets, and other circuit access points in the outside plant of the carrier) so as to allow the customer to ascertain with a reasonable degree of accuracy the actual physical path of each subscribed circuit.
- 8.3.2. Physical path information for newly provisioned subscribed circuits is to be available to the customer within 5 business days after the circuit has been installed, and within 15 business days for existing, in-place subscribed circuits.
- 8.3.3. Any planned moves, changes, or rearrangements that affect the physical path of a subscribed circuit are to be communicated at least 24 hours in advance to the customer, and information related to a move, change, or rearrangement that was as a result of unplanned activity is to be provided within 24 hours of the change.
- 8.3.4. Updated information regarding the revised physical path of subscribed circuits would be available to the customer within 5 business days for planned actions, and within 15 business days for unplanned activities.
- 8.3.5. Provision of the service would be suspended altogether in the instance of a major telephone outage. Once restored to service, current physical path information for a subscribed circuit would be developed and made available to the customer within ninety days of the restoration of service.
- 8.3.6. The carrier must establish a secure database or other means that would allow the customer to obtain information of the physical path for only its subscribed circuits, subject to appropriate authentication and authorization. Where practicable, the information should be made available on a 24 hour by seven-day basis.

8.4. RATES

Rates for CFA are based upon the time required to collect the circuit path data. The company will give the customer a good faith estimate of the time period needed to perform the requested service. The customer will be billed those charges, along with the charges established by any connecting carrier for the service.
